## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 9-10, 13-16 and 20-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Kendel (US 5,220,319).

Kendel clearly discloses the claimed invention such as a grip flange (200) configured for use with a mobile station (101). (see Figures 1-2).

The method claims 13-15 and 20-21 are deemed inherit.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kendel (US 5,220,319).

Kendel substantially discloses the claimed invention except for the material of the grip body being of a membranous material.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a membranous material into the grip body, since it has been held that to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

### *Response to Argument*

5. Applicant's arguments filed 3/30/05 have been fully considered but they are not persuasive. Because:

The applicant argues that the Kendel's grip flange (200) is not sufficient for gripping action. The examiner respectfully disagrees. The applicant fails to specifically disclose how sufficient is acceptable. The Kendel's grip flange may not be sufficient for gripping with respect to the applicant but is sufficient for gripping to a child or to any gripping tool. The applicant claim "sufficient" language is not carry any patentable weight. Kendel clearly disclosed the claimed invention.

### *Conclusion*

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 2833

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
